Product Description

15-Inch Touch Screen Laser Machine For Skin Types I VI Hair Removal

Product Description:

The Hair Removal Laser Machine comes equipped with state-of-the-art safety features, including Skin Contact Cooling and Automatic Power Cut-off. The Skin Contact Cooling system keeps the skin cool to the touch during treatment, preventing any discomfort or burns. The Automatic Power Cut-off feature ensures that the machine will shut off if it detects any irregularities or safety concerns during treatment.

The Hair Removal Laser Machine is also equipped with a large, 15-inch Touch Screen display, making it easy to navigate and customize your treatment settings. With a Pulse Duration range of 10-400 Ms, you can adjust the intensity and duration of each treatment to suit your individual needs and preferences.

The Coolingtype of the Hair Removal Laser Machine is TEC+Sapphire Contact Cooling. This innovative cooling technology ensures that the skin stays cool and comfortable during treatment, while also protecting the surrounding tissue from damage.

The Hair Removal Laser Machine is a powerful device, with a Machine Power of 1200W. This high level of power ensures that you will see results quickly and efficiently, with fewer treatments required overall.

Experience the benefits of our Painless Hair Removal System with the Hair Removal Laser Machine. Our Advanced Hair Removal System is designed to provide safe, effective, and long-lasting hair removal results. With its advanced technology and state-of-the-art features, the Hair Removal Laser Machine is the ultimate choice for anyone looking for a reliable and effective hair removal solution.

Applications:

The NGY-1 hair removal laser machine is a powerful and effective permanent hair removal device that can be used in a variety of settings and scenarios. Whether you're looking to remove unwanted hair at home, in a salon, or in a medical facility, the NGY-1 is the perfect choice.

With its 1200W power, this laser hair elimination machine is capable of removing hair quickly and efficiently, making it ideal for busy salons and clinics. Its stationary, vertical style also makes it easy to use and maneuver, allowing you to target even hard-to-reach areas with ease.

The NGY-1 is suitable for use on all skin types, from I to VI, making it a versatile choice for a wide range of clients. Its 600W power ensures that it is effective on even the thickest and most stubborn hair, while its permanent hair removal device technology means that you can enjoy long-lasting results.

Whether you're looking to remove hair from the legs, arms, underarms, or bikini area, the NGY-1 hair removal laser machine is the perfect choice. It can also be used to remove hair from the face, including the upper lip, chin, and cheeks.

Overall, the NGY-1 hair removal laser machine is a versatile and effective choice for anyone looking for a permanent hair removal device. Whether you're a professional looking to add to your salon or clinic, or an individual looking for a convenient and effective way to remove unwanted hair, the NGY-1 is the perfect choice.

Support and Services:

The Hair Removal Laser Machine is a high-tech product designed to remove unwanted hair from various parts of the body. It is equipped with advanced laser technology that targets hair follicles and destroys them, resulting in long-lasting hair reduction.

Our technical support team is available to assist with any questions or concerns you may have regarding the use and maintenance of the Hair Removal Laser Machine. We provide detailed user manuals and instructional videos to help you get the most out of your product. In addition, we offer a range of services to ensure your Hair Removal Laser Machine is always in top working condition. These include regular maintenance and calibration checks, as well as repair services should any issues arise.

Our goal is to provide our customers with the highest level of support and service to ensure that their Hair Removal Laser Machine delivers optimal results every time.
